

FILLER

WHAT ARE FILLERS?

- ≡ Fillers consist of Hyaluronic Acid or HA, a naturally occurring substance in the body. The area is filled, then HA attracts moisture, smooth fine lines.
- ≡ A dramatically effective concept in treating fine lines and wrinkles like laugh lines, marionette lines and fine lines of the upper lip.
- ≡ Natural looking enhancement of the lips and cheeks.
- ≡ Can also be used for hollowness in the under-eye area.

HOW LONG DO THEY LAST?

- ≡ Depending on where and what filler is injected, 6 months to two years.
- ≡ Juvederm and Volbella last up to 6 months.
- ≡ Vollure lasts up to 18 months.
- ≡ Voluma lasts up to 2 years.

HOW IS IT USED?

- ≡ Fillers are delivered by the manufacturer ready to go.
- ≡ Each injector has their own unique and artistic touch to their injecting technique.

SIDE EFFECTS

- ≡ The most common side effect is pin point bruising at the site of the injections. Very rare and is easily to cover with makeup.
- ≡ Small amount of swelling in the injected areas is very common. More so in the lips.
